A Verified, Step-by-Step Plan to Get Results
Mango Farmers of the Krishnagiri – Dharmapuri – Bargur Belt · August 2026

1. சரிபார்ப்பு அறிக்கை

1. Verification log — what was checked, what is confirmed, what remains uncertain

Every campaign document already produced rests on the facts below. They have been re-checked against primary and press sources. Where something could not be confirmed, that is stated rather than glossed over.

Claim used across the documents	Status	Basis and remarks
MIP of ₹1,545.41 per quintal notified for Totapuri, Tamil Nadu, 2026	CONFIRMED	Multiple independent reports of the Union Agriculture Ministry approval, July 2026, on a proposal from the Government of Tamil Nadu.
96,879 MT approved under MIS	CONFIRMED	Same source set. Note it is a state-wide figure, not belt-specific.
Copra approval > ₹1,049.16 crore at MSP under PSS, same order	CONFIRMED	Useful comparison: a storable crop with mature machinery alongside a perishable one without it.
Farm-gate price of ₹4-5 per kg	REPORTED	Consistently stated by growers and associations in press reports. Not an official series — always describe it as reported, never as measured.
2,81,733 farmers; 2,13,023 marginal; 45,970 small	CONFIRMED	Krishnagiri district administration. Published percentages sum only approximately; quote the absolute numbers.
Over 75% of district cultivated area rainfed	CONFIRMED	District agriculture plan documentation.
Paddy: ₹2,545 / ₹2,500 per quintal including state incentive of ₹156 / ₹131	CONFIRMED	Tamil Nadu procurement price announcement, KMS 2025-26. Verify the current season's figure before reprinting.
Kuruvai Special Package 2026, ₹134.83 crore	CONFIRMED	And extended to non-delta paddy growers in the 2026-27 revised budget — which is why the comparison must be framed as crop-versus-crop, not region-versus-region.
Five mango processing parks proposed for the two districts	ANNOUNCED	A proposal in a vision document. No detailed project report, ownership structure or financing plan is public. Treat as a proposal, not a commitment.
Tamil Nadu school dropout under 1%	CONFIRMED	UDISE+ 2024-25. This is why no dropout claim is made anywhere in the documents.
Procurement actually delivered under the 2026 MIS	NOT ESTABLISHED	No public reporting of quantity procured, growers covered, centres operating or payment lag. This absence is the single most important fact in the entire campaign.
Cost of cultivation for Totapuri in these districts	DOES NOT EXIST	No current published district survey. Every price argument is weakened by this gap.

இரண்டு புதிய கண்டுபிடிப்புகள் — உடனடியாகப் பயன்படுத்தக்கூடியவை

Two findings from this verification round change what you should do first.

(a) The farmer registry already exists. Tamil Nadu operates a farmer registry under AgriStack (*tnfr.agristack.gov.in*). Registration is the precondition for almost every scheme and for procurement eligibility. Getting every member registered costs nothing and removes the commonest reason a grower is turned away at a procurement centre.

(b) A working template for mango MIS exists in another state. Himachal Pradesh runs the same central scheme for processing-grade mango through named state corporations, with a published per-kg rate plus a separate handling charge, a fixed number of procurement centres planned from three to five years of arrival data, eligibility tied to a horticulture card, and a landholding ceiling that excludes contractors so only genuine growers are paid. **You are not asking Tamil Nadu to invent anything. You are asking it to do what another state already does under the same scheme.** That is a far easier request to grant.

2. நேர்மையான பகுப்பாய்வு

2. Honest analysis — what will actually produce results, and what will not

2.1 ஏன் கோரிக்கைகள் தோல்வியடைகின்றன

Most farmer campaigns fail not because the demand is wrong but because of *how* it is addressed. A demand becomes an action only when five things are present at once. Missing any one of them, the file stops moving.

Ingredient	What it means in practice
1. A named officer	Not “the Government”. A specific post with the authority to sign the order — usually the District Collector, the Commissioner of Horticulture, or the Secretary.
2. An existing instrument	An order, scheme or guideline that already permits the action. Anything requiring a new scheme takes years; anything within an existing power can happen in a fortnight.
3. A budget head	Which existing allocation it is charged to. Asks that cost nothing are the fastest of all, because no finance concurrence is needed.
4. A file reference and a date	Your petition must be acknowledged and given a number. An unnumbered representation does not exist administratively.
5. A follow-up owner	One named person from your side who checks the file every fortnight and keeps a written record of every reply.

மிக முக்கியமான உத்தி: மலிவான கோரிக்கைகளை ஆட்சியரிடம், விலையுயர்ந்தவற்றை அமைச்சரிடம்.

The single most important strategic insight in this document. Campaigns fail by aiming everything at the Chief Minister. The four measures that would change the most this year cost almost nothing and can be ordered by the **District Collector alone, tomorrow, without any reference to Chennai**. Aim those at the Collector. Reserve the Chief Minister and the Ministers for the things that genuinely need a Cabinet decision — the stabilisation mission, the park equity structure, and the pre-flowering price announcement. Asking the Collector for a daily price board is a request that can be granted. Asking the Chief Minister for a daily price board is a request that will be forwarded to the Collector, six months later.

2.2 எந்தக் கோரிக்கை எங்கே செல்ல வேண்டும்

The ask	Who can order it	Cost	Realistic time
Weekly publication of MIS procurement figures	District Collector / Commissioner of Horticulture	Nil	2–4 weeks. Pure administrative order.
Daily price board at every pulp unit and market yard	District Collector	Nil	2–4 weeks. A comparable direction has been issued by the Chittoor administration.
District mango grievance cell with published number	District Collector	Under ₹50 lakh a year	30 days. Existing staff.
Written tripartite offtake agreement before flowering	Collector convenes; Secretary Agriculture guarantees	Nil	Convene by November for the coming season.
Procurement centre in every mango block	Nodal procuring agency with the Collector	Within existing MIS operating cost	Must be in place before harvest, so decide by February.
Cost-of-cultivation survey	Dept. of Agricultural Economics with TNAU	₹3–5 crore	6–9 months. Commission now for the next season.
Price announced in December, before flowering	State proposal to the Union Ministry under MIS	Nil extra	Requires only that the proposal be submitted earlier than before.
FPO capitalisation for aggregation and advance payment	NABARD / SFAC under the central FPO scheme	Central scheme funds	12–18 months. Start the CBBO conversation now.
26% grower equity in the processing parks	Cabinet, at the time the structure is approved	Nil today	Only possible before the DPR is approved. This window is open now and will close.
Permanent Mango Price Stabilization Mission	Cabinet / Finance Department	₹300 crore revolving corpus	12–18 months. The long campaign.

இதைக் கவனியுங்கள்: பத்தில் ஐந்து கோரிக்கைகளுக்கு ஒரு ரூபாய் கூட செலவில்லை.

Five of the ten asks cost nothing at all, and four of those five can be ordered by the District Collector. If you achieve only those five in the coming year, the bargaining position of every grower in the belt changes measurably — and you will have done it without a single rupee of new expenditure being sanctioned.

3. முதல் 90 நாட்கள்

3. The first 90 days — week by week

Each row names one output and one owner. Do not start a task without naming the person responsible for it in the first column of your own copy.

When	Do this	Output that proves it happened
Week 1	Form a core group of 7 people. Assign one convener, one secretary who keeps every letter and reply, one treasurer, two field coordinators, one media contact, one data person.	A written list of names, roles and phone numbers, circulated to all members.
Week 1	Open a register of correspondence. Every letter sent, every acknowledgement number, every reply, every date.	A physical register plus photographs of each page kept on a phone.
Week 2	Register every member on the Tamil Nadu farmer registry. Fix land record errors now, not at the procurement centre.	Count of members registered, with registry numbers.
Week 2-3	Submit the <i>Request for Direct Consultation</i> to the District Collector, your MLA, the MP, the Minister for Agriculture, the Minister for Horticulture and the Chief Minister's office. Attach both reports.	A dated, stamped acknowledgement from each office. Without this the submission does not exist.
Week 3	Separately submit a short letter to the Collector alone, asking only for the four zero-cost measures. Keep it to one page.	Acknowledgement number. This is the letter most likely to succeed.
Week 4	Begin the household survey. Target 300 completed forms. Train 15 volunteers for one afternoon.	Forms coming in daily; a tally sheet updated weekly.
Week 4-6	Meet the Assistant Director of Horticulture and the NABARD District Development Manager. Ask to be onboarded under the central FPO scheme with a mango value-chain focus.	Name of the CBBO assigned, or a written note of what is required next.
Week 5-6	Print and put up the chapter posters and the paddy-versus-mango comparison in every village, cooperative society and market yard.	Photographs of the posters in place, dated.
Week 6-8	Brief every MLA in both districts, of every party, and hand each the <i>Appeal to Raise in Assembly</i> with the eight questions.	A list of who was met, who agreed to raise it, and who did not.
Week 8	Brief the press — district correspondents of Tamil and English dailies. Lead with one fact: ₹15.45 notified, ₹4-5 received.	Any published item, however small. Keep cuttings.
Week 9-10	Approach the pulp processors' federation. Propose a joint approach on domestic demand and the mid-day meal proposal.	One meeting held, minuted, whatever the outcome.
Week 10-12	Close the survey. Tabulate honestly. Produce a four-page findings note.	The findings note. This is your single most valuable asset, because nobody else has this data.
Week 12	Follow up in writing on every acknowledgement that has not received a substantive reply. Quote the acknowledgement number and the date.	Second-reminder letters filed in the register.

4. மாதம் 4 முதல் 12 வரை

4. Months 4 to 12 — converting attention into machinery

- 1

அக்டோபர்-நவம்பர்: பூக்கும் முன் கூட்டம்
Press for the tripartite meeting to be convened **before flowering** and for its outcome to be recorded as a written agreement with price bands, volumes, an independent quality assessment procedure and payment timelines — not a verbal assurance. This single change addresses the documented failure of the previous meeting.
- 2

டிசம்பர்: அடுத்த பருவத்தின் விலை அறிவிப்பு
Ask the State to submit its MIS proposal to the Union Ministry early enough that the price is announced in December. Point out that paddy MSP is announced before sowing and that the same logic applies with greater force to a crop that cannot be stored.
- 3

ஜனவரி-பிப்ரவரி: கொள்முதல் நிலையங்கள் முடிவு
The number and location of procurement centres must be decided before February for them to exist by May. Submit a block-by-block list of proposed sites yourselves, with distances, so the administration has nothing left to work out.

4

தொடர்ந்து: விவசாயி உற்பத்தியாளர் நிறுவனம்

Complete FPO federation and registration, recruit a paid chief executive under the scheme's management support, and apply for the equity grant and credit guarantee. The objective is working capital sufficient to **pay members on delivery** — the one capability that changes the price.

5

பூங்காக்களின் அமைப்பு முடிவாகும் முன்

Press the 26% grower equity condition **while the park structure is still being decided**. Once detailed project reports are approved with a private ownership structure, this cannot be reopened. Of everything in this playbook, this has the shortest window.

6

மாநிலம் தழுவிய கூட்டணி

Contact growers' associations in Dindigul, Salem and Theni, and in Kolar and Chittoor. A three-state problem needs more than one district's voice, and the national expert committee is a natural forum to address jointly.

5. பொது ஆதரவு

5. Building public support — and who your allies actually are

Group	Stance	How to approach them
Harvest labourers	Natural ally	They lose everything when fruit is abandoned and are in no scheme at all. Include them in the delegation and in the survey. Their presence makes the case unanswerable.
Women managing orchards	Natural ally	Register them in their own right; offer joint spousal FPO membership; put at least one on every delegation.
Pulp processors	Ally on demand	Opponents on price, allies on demand creation. They proposed mango juice in the mid-day meal themselves. Work with them on the demand side and negotiate separately on price.
Delta paddy farmers	Ally — do not attack	They face Mettur closure and water scarcity. Attacking them costs you votes in the Assembly and gains nothing. The comparison is crop-versus-crop, never region-versus-region.
Other mango districts	Natural ally	Dindigul, Salem, Theni. A state-wide crop constituency is far harder to ignore than one district.
District press	Winnable	Give them one verified number and one photograph, not a speech. The ₹15.45-versus-₹4 gap is the story.
All political parties	Winnable equally	Brief every party. A measure supported across parties survives a change of government; one identified with a single party does not.

பொது ஆதரவின் விதி: உணர்ச்சி அல்ல, சான்று.

Public sympathy is easy to get and worth little. What moves administration is verifiable evidence held by an organised group that follows up. Three hundred honest survey forms will do more than three thousand people at a demonstration — and the two together do more than either alone. Build the evidence first; it makes every later action credible.

6. ஆவணங்களை எங்கே பயன்படுத்துவது

6. Which document goes to whom

Document	Give it to	When and why
Request for Direct Consultation	CM, Ministers, MLA, MP, Collector	First. It is the door-opener; everything else is its annexure.
Mango Farmers Crisis — policy report	Officials, Ministers, expert committee	As the technical annexure. Its Section 15 memorandum can be extracted and signed on its own.
The Mango Farming Household	Ministers, press, Assembly members	When the argument needs to move from prices to people. Its Chapter 11 survey is the tool you actually run.
Chapter posters (12)	Villages, societies, block offices, press	Public education. Non-partisan, so they can be displayed anywhere.
Value addition posters (6)	Youth, colleges, industry, press	To argue for the future rather than only against the present.
Paddy vs Mango comparison	MLAs, Ministers, press	The sharpest single argument you have. Two pages, entirely factual.
Appeal to Raise in Assembly	Every MLA of every party	With an offer to brief them. Page 2 gives them eight questions to read out verbatim.
Vote poster	Campaign use only	Keep separate from official submissions. Mixing a campaign document with a representation weakens both.

7. மதிப்பீட்டுப் பட்டியல்

7. The scoreboard — review this every month

Campaigns drift because nobody measures them. Read this table aloud at every monthly meeting and fill in the date each item was achieved.

Measure	Target	Achieved on
Members registered on the farmer registry	100% of members	_____
Acknowledgements received for submissions	Every office	_____
Household survey forms completed	300	_____
MLAs briefed, across all parties	All in both districts	_____
Questions raised on the floor of the Assembly	At least 1	_____
Daily price boards displayed at pulp units	Ordered by Collector	_____
Weekly procurement figures published	Ordered	_____
Grievance cell opened with published number	Both districts	_____
Written tripartite agreement signed before flowering	By November	_____
Cost-of-cultivation survey commissioned	Before next flowering	_____
Season price announced before flowering	December	_____
Procurement centres confirmed per block	By February	_____
FPO registered and capitalised	Within 12 months	_____
Grower equity condition accepted for the parks	Before DPR approval	_____

8. பதில் வரவில்லை என்றால்

8. If nothing happens — a lawful escalation ladder

Move one rung at a time, and only after the previous rung has been given a written deadline that has passed. Record everything. Never skip rungs: an escalation that arrives before the earlier step is documented looks like impatience rather than persistence.

- 1 எழுத்துப்பூர்வ நினைவூட்டல்**
A written reminder quoting the acknowledgement number and the date, with a stated deadline of three weeks.
- 2 தகவல் அறியும் உரிமைச் சட்ட விண்ணப்பம்**
A Right to Information application asking exactly the factual questions in the Assembly appeal — quantity procured, growers covered, centres operating, payment lag. This is the most powerful and least confrontational tool available to you, and it produces a document you can publish.
- 3 குறை தீர்ப்பு நாள் கூட்டம்**
Attend the district public grievance day in person, as a group, with the file and the acknowledgement numbers.
- 4 பேரவைக் கேள்வி**
Have a member of any party place the eight questions on the floor. An answer on the record is a permanent asset.
- 5 பொது வெளியீடு**
Publish the survey findings and the RTI replies together, to the press. Facts nobody can contest, released as a package.
- 6 அமைதியான, அனுமதி பெற்ற பொதுக்கூட்டம்**
A peaceful public meeting or demonstration, with the required permissions obtained in advance and in writing. Keep it lawful, keep it orderly, and keep the evidence at the centre of it.

9. இந்த முயற்சி எப்படித் தோல்வியடையும்

9. How this effort would fail — read this twice

Failure mode	How to prevent it
One unverified claim	A single invented statistic discredits every true thing in eight documents. Never state as fact anything marked REPORTED or NOT ESTABLISHED in Section 1.
Becoming identified with one party	Brief every party equally and say so in writing. A measure owned by one party dies with that party's term.
Attacking the delta	It converts potential allies into opponents and is factually wrong, since paddy support now reaches non-delta districts too.
Aiming everything at the Chief Minister	The cheap, high-value asks belong to the Collector. Send them there and they can be granted this month.
No written record	An unacknowledged petition administratively does not exist. Get a stamp on everything, every time.
Losing momentum after the first meeting	A meeting is not an outcome. Only the scoreboard in Section 7 tells you whether anything actually changed.
The survey never being finished	It is your only unique asset. Nothing else you can do is as valuable, because no government or researcher holds this data.
Volunteer burnout	Seven named people with defined roles, meeting monthly. Not one person doing everything until they stop.

10. இந்த வாரமே செய்ய வேண்டியவை

10. Do these seven things this week

1. Name the seven-person core group and write the list down.
 2. Buy a bound register for correspondence and rule its columns: date, to whom, subject, acknowledgement number, reply, follow-up date.
 3. Print ten copies of the *Request for Direct Consultation* and fill in every blank field.
 4. Verify the current name and designation of the Chief Minister, the Minister for Agriculture, the Minister for Horticulture, your MLA and the District Collector before addressing anything.
 5. Draft the one-page letter to the Collector asking only for the four zero-cost measures.
 6. Photocopy fifty survey forms from Chapter 11 of the household report.
 7. Fix a standing date and place for the monthly meeting, and tell every member.

கடைசியாக ஒன்று.

The strongest thing about this campaign is not its anger. It is that every number in it can be checked, that it asks nothing be taken from anyone else, and that most of what it seeks costs the Government nothing at all. Keep it that way. An organised group that arrives with evidence, that follows up in writing, that has allies on every side of the House and no enemies among other farmers, is very difficult for any administration to refuse indefinitely — and that, rather than any single meeting or announcement, is what produces a result.

Standing caution. Several facts in this playbook are recent and may move. Before each submission, re-verify: the current holders of the offices you are addressing; the current season's paddy procurement price; the status of the processing park proposals; and any new announcement on mango procurement. A document that is right on every point except the name at the top is still returned.
